# Before Using

## What's inside

- Equipment x 1
- Power cable with Plug x 1
- User manual x 1
- Iron holder x 2

## Open Instruction

Help preserve the environment! Ensure that this product is recycled at the end of its life. Your supplier can give details of local arrangements for the disposal of products.

Please open the equipment carefully, and check all the spare parts are included or not. If any part of the cause of the failure due to improper transportation or carton, please keep the packing materials and immediately inform the shipper to check. If the equipment must be returned to the factory, the equipment should be use the original carton and packaging.

## AC Power Supply

The equipment power supply is able to adapt to the wide input voltage. Please confirm the input voltage is in the scale of rated voltage. The equipment can adapt to 100V-240V AC voltage, Frequency 50/60HZ. It cannot run a rheostat (variable resistor) or dimmer circuits.

## Safety Instruction

This product is I level protection equipment, so it is must be connected well and connected by the professional people.

- Make sure the voltage isn't be above or below which the user manual rated values.
- Confirm the power cord is not a sword cut or damaged.

- Must be cut off the power supply in the condition of no using or cleaning.
- Only allowed with the power cord plug connection. Please do not force when unplug the power cord to pull the plug.
- Be careful in the process of installation of equipment. Avoid touching the bare wire, otherwise it will suffer fatal shocks.
- Don't look the light source directly, otherwise it will hurt the eyes.
- Please use the equipment wires appropriate.
- Without the manufacturer's authorization or lay people don't remove, repair and modification of equipment.

# Introduction

## Specification

### PHYSICAL

Dimensions (WxHxD): 512 x 326 x 244 mm

Packaging dimensions (WxHxD): 575 x 410 x 395 mm

Nett weight: 16,9 kg Gross

weight: 19 kg

### MOUNTING OPTIONS

Hanging: 2x Omega bracket with 2x 1/4 turn quick lock fastner

Standing: 4x rubber feet

2nd suspension / safety wire: 1x eye in the bottom of the fixture to pass a safety wire or carabiner

Arrayable: Horizontal & vertical

### CONTROL

Menu control: Via 2.4" TFT display with 4 touch buttons

In/Link: XLR 5 pin

Control : DMX512, master/slave

DMX mode : 3/5/17/23 channels

Dimmer mode: LED, halogen

### OPTICAL

Beam angle: 7° - 58°

Light output RGBW 7°: 38800 lux @ 2m | 11450 lux @ 4m | 4287 lux @ 6m

Light output RGBW 58°: 4690 lux @ 2m | 1198 lux @ 4m | 513 lux @ 6m

Colours: RGBW

Control: In 4 segments of 9 LED horizontal

Strobe: 0-20 Hz

Dimming curves: 4

## **ELECTRICAL**

Fixture rated power: 500W

Input power: 100 - 240V ~ 50/60 Hz - Auto switching power supply

LED engine: 36x 15W RGBW

In/Link: PowerCON TRUE1 - max link current 10A

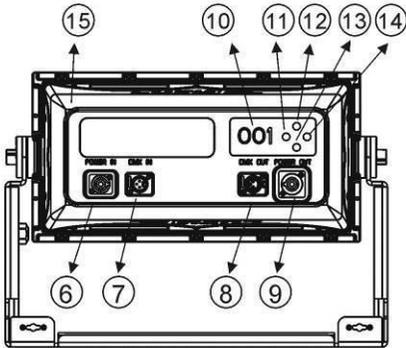

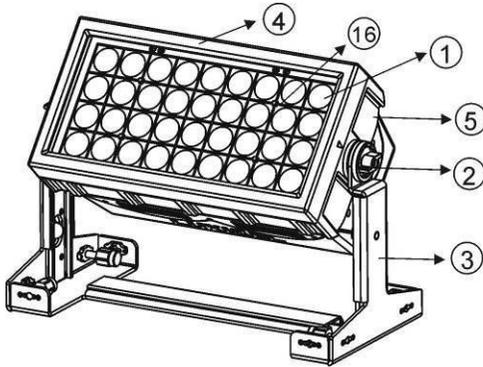

Refresh rate: 3000 Hz

## **ENVIRONMENTAL**

IP rating: IP65

Cooling: Forced air cooling

# Installation

## Installation Requirements

- This equipment can be used in many places, it can hang and put on the ground.
- Choosing a suitable place to put or hang the equipment when installation. Must be use the special screws and hook to make sure the lamp's weight is in the weight range.
- When installing the equipment, ensure no inflammable and explosive goods at 0.5meter distance.
- Please ask the professionals to install the equipment, any improper installation will cause personal injury or material damage.
- To prevent others entering the working areas below, the installation or maintenance of equipment with suitable and stable platform
- The equipment must be placed in ventilated place, at least 50 cm from the ground, please ensure that the vent without clogging.

## Power supply connection

The equipment can be used in the wide voltage input。 Please make sure the voltage is the scale of rated voltage when connecting the power.The equipment can adapt to 100V to 240 V AC voltage and 50-60 Hz.

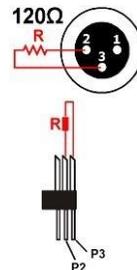

s	Connection	Pin
Brown	AC Live	1
Blue	AC Neutral	2
Green/Yellow	AC Ground	3

## DMX Signal Connection

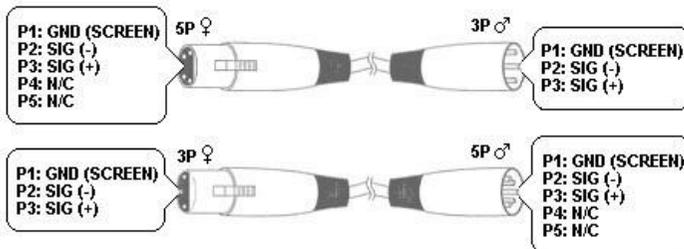

1. Use DMX512 controller, use the DMX signal ( male ) to plug into the first light (female) 3pin.
2. Put out of the equipment of the first signal wire(head), connected to the equipment of the next 3 pin plug(female), so on. See below pictures.

terminator

How to turn the controller line from 3-pins into 5-pins (plug and socket).

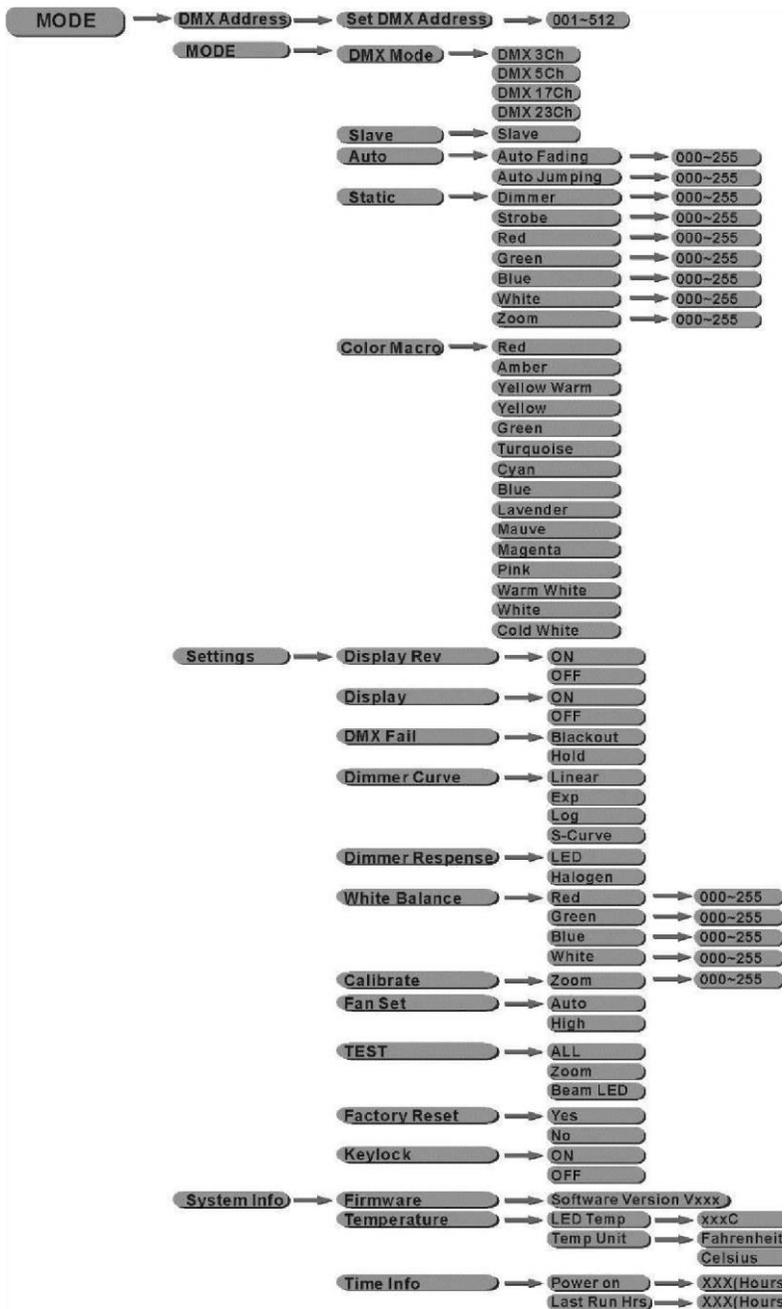

# Operating Instruction

## Control board function

Button	Function
Mode	Choose mode or function exit
ENTER	Current show menu or enter into the current selected function
UP	Increase the value
DOWN	Decrease the value

- When the spotlight is properly connected to the mains, “Software Update, Please Wait” (only for internal purposes), “Welcome to LED Wash Zoom”, the model name and software version appear successively on the display during the start-up process. After this operation, the spotlight is ready for use and starts in the mode that was previously selected.
- If one of the DMX operating modes is activated and there is no DMX signal at the DMX input, the display starts to flash after a few seconds.
- After approximately 30 seconds of inactivity, the display will automatically show the currently active operating mode.
- Fast Access Feature: In order to simplify the menu guide, the device has an intelligent menu structure which allows menu and sub-menu items that were last selected to be accessed directly. 1. Pressing MODE and ENTER simultaneously will take you directly to the sub-menu item that was last edited and allows you to instantly change the corresponding value as desired (DMX start address and all operating modes). 2. Pressing MODE will take you directly to the menu item that was last selected and edited; now press ENTER to instantly access the sub-menu item that was selected and edited last (DMX start address and all operating modes).

## Menu Map Menu Instruction:

## MAIN DISPLAY DMX MODE

In the upper line of the display, the DMX (DMX 3Ch,4Ch1,4Ch2,5Ch,15Ch,20Ch,21Ch,37Ch) is display and the DMX start address is prominently shown in the centre (for example DMX2Ch and ADDRESS 001). As soon as the DMX signal is interrupted, the display starts flashing; if the DMX signal is present again, the display stops flashing.

## MAIN DISPLAY SLAVE MODE

In the upper line the display, the preset DMX is displayed and “SALVE” is prominently shown in the center. As soon as the control signal is interrupted, the display starts flashing; if the control signal is present again, the display stops flashing.

## MAIN DISPLAY STANDALONE MODE

In the upper line of display, the preset DMX mode is displayed and the currently activated Auto mode, static mode STATIC, or colour macro mode COLOUR MACRO.

## SETTING THE DMX START ADDRESS(ADDRESS)

Pressing MODE will take you the selection menu for system setting. Using UP and DOWN, select the menu item “ADDRESS” (colored background)and confirm with ENTER. This is followed by the display of the menu item “Set DMX Address” .Press ENTER again to select the DMX start address as desired button using the UP and DOWM button. If the start address is changed, the address color changes to red. Confirm with ENTER and Press MODE twice to return to the main display. The main display is automatically activated if no input is made within about 30 seconds.
